## Description

### Great BOAT

It is the smaller of the two Flyer GT models offered by Bénéteau for leisure use. A sporty and fast boat with a bright interior

The living structure adopts Bénéteau's Air Step patent, which provides for two air intakes at three-quarters of the bow, into which the air coming from the outside is forcibly conveyed into a redan with the V facing the bow. From here, the air is discharged through external skids. This technology amplifies the performance and stability of the boat and helps to reduce fuel consumption, achieve faster acceleration, benefit from greater safety in all conditions and ensure a "cushion" effect in the aft center part of the hull.

2024 New awning -water pump replacement - complete engine service - replaced 1 fuel pump - hull polishing

2023 Total Polishing - Stern Closing Awning

2022 Hull polishing - right stern foot replacement - new engine control unit
