Description

Like a sports car

The design of the R4 Walkaround is heavily influenced by the world of sports cars, with some distinctive elements that characterize the decisive silhouette, such as the steel T-Top and the carbon air intakes on the sides of the hull.

The walkaround area is so large that you can look at the sea from multiple points of view.

The designer's philosophy of optimising space even in unexpected ways is fully respected with the retractable bollards, so there are no distractions from the sea.

All controls and navigation systems are integrated into the smooth-lined teak console. The rudder, Volvo Penta IPS joystick and two 12-inch touchscreens promise an exciting driving experience.

All it takes is a tap on the touch screen of the controls and in 30 seconds the XTensions bulwarks open, transforming the beach into an area of 25 square meters. This means that it can become a lounge, a solarium with integrated chaise longue, an open space for parties. You won't go unnoticed in any of these cases.

The beach can accommodate the additional Transformer platform, which rotates 270° on its axis to support embarkation and disembarkation, diving and water games, and to stay even closer to the sea.

The maximization of space is the design idea that is always present on the Walkaround EVO. The interiors are designed as an open space from bow to stern
