Description

The 26 Oceanic has the aesthetic and dynamic characteristics of both the dinghy and the boat; The pneumatic element determines stability and unsinkability, while the fiberglass bulwarks protect the cockpit as on a motorboat. As in the rest of the range, in the 26 Oceanic great attention has been paid to the search for solutions that allow you to use every space and make the most of it through simple transformations such as the practical passage to the bow.

A practical sliding drum positioned on the side of the console allows access to the dinette which includes a large bed in the bow, one in the stern and a separate bathroom, all embellished with a warm parquet. The room is ventilated and illuminated by a large manhole and four side portholes. In addition, in the compartment below deck, the height is such that it can stand both in the hallway and in the bathroom. Under the bow bed, three large lockers allow you to comfortably stow everything you need.

The external layout is completely renewed from the passage to reach the large bow sundeck. The cockpit consists of a large seat that easily converts into a large sundeck and a galley area with sink, hob and a cockpit fridge. The console, framed by a smoked windscreen, has a screen-printed dashboard with a carbon check-panel and is well organized with all the tools that can be easily consulted. The workstation is completed by a comfortable adjustable backrest, which is also ideal for standing driving. Both at the stern and at the bow, the high handrails guarantee safe movements even while sailing.
