

SALE NEW

galeon 450 htc

Description

The striking exterior is highlighted by a full-length glass roof that illuminates the interior and gives this model a very sporty character. With the flybridge overhang removed, the cockpit area can enjoy the sun with the targa roof retracted. The recognizable design with large windows and dynamic features marks the fourth generation of Galeon yachts in collaboration with the Tony Castro Design Studio with a focus on practicality and versatility. The perfect proportions and better handling of the hardtop are sure to satisfy the most demanding yacht owners.

The main deck houses two separate recreation areas with the bow easily accessible from the starboard sliding doors next to the helm. Guests can choose to support the foldable bimini and forward-facing seat for added protection from the elements. The cockpit allows boarding from all sides thanks to the full-size hydraulic aft platform and Beach Mode with semi-glazed panels. Lower both sides to extend the usable space when mooring and invite your guests to activities such as diving, fishing or sunbathing – exciting! The bathing platform acts as an elevator for all your water toys and allows easy access to the stern-facing grill area.

THE HTC 450 HAS BEEN DEVELOPED ALONG THE FLYBRIDGE VARIANT AND SHARES MOST OF ITS UNIQUE FEATURES WHEN IT COMES TO INNOVATIONS AND SPACE DISTRIBUTION, BUT OFFERS A SPORTIER DESIGN.

Inside, there is a classic layout with the sleeping area set back, divided from the cockpit only by sliding glass doors. The galley and wheelhouse are moved forward with the cabins located on the lower deck.
