

SALE NEW

# pardo yachts Endurance 60

## Description

The new pardo yacht endurance 60 leaving from the port of saint-tropez to explore the mediterranean sea.

Previewed at the cannes 2021 boat show, the pardo yachts endurance 60 has once again struck a big blow in the world of yachting by breaking the code and affirming its position as a trend creator and master of design. It is greatly different from the competition of trawler or displacement boats by this elegant and aggressive line, a trademark of the italian shipyard pardo yachts.

Thanks to its semi-plant hull, this boat which measures 18 meters in length has low fuel consumption and has a range of 800 nautical miles at a speed of 12 knots. Its maximum speed can still reach 25 knots by choosing the volvo penta ips 800 engine option.

The pardo endurance 60 boat is also attractive with its floating terraces open on the sea which increase the deck area by approximately 35 m2 once the anchor is positioned in your favorite anchorage in the bay of saint-tropez.

Also featured on all pardo yachts boat ranges, its sureshade electric bimini can be controlled by bluetooth from your smartphone. The hydraulic bathing platform makes it easy to launch a williams 325 tender or a jet-ski.

Take the forward teak passages to relax on the large sun pad at the bow or have an aperitif on the retractable table embedded in the boat's deck.

What's new on this boat, compared to the walkaround range, is its large flybridge which offers an amazing view of the old port of saint-tropez once
