Description

Delta 54 IPS- 2018

The carbon fiber sportcruiser from Delta Powerboats. Naval architect and Delta co-founder Lars Modin has created a design that stands out and sets a new benchmark for fuel efficiency among performance motor yachts. Resourceful exterior areas with comfortable and safe deck arrangements combined with authentic craftsmanship, luxury features and state-of-the-art IPS pod drives enable the boat's multipurpose nature — the 54 is designed to excel in all types of activities on the water. The light and airy deck house is accessed via sliding glass doors aft or a captain's pantograph-opening door on starboard side. Belowdecks a generous owner's cabin forward with en-suite head and shower along with two amidship twin- or optional double-guest cabins accommodate six guests in premium-class comfort. As the world's first production boat with a carbon fiber construction, the award-winning Delta 54 delivers unparalleled strength-to-weight ratio and fuel efficiency. Built to each client's specifications she welcomes you to a world of outstanding performance and the opportunity to create the yacht of your dreams.

Deep V-Hull optimized for Volvo Penta IPS pod drives.

Hull, stringers, bulkheads, deck and superstructure constructed from vacuum infused carbon fiber compite. Lamination made according to Diab Core Infusion Technology.

Dark grey painted topsides with black style lines, white painted superstructure, teak laid side deck, aft cockpit and bathina platform.
