Description

All the pluses and class of a top-of-the-range 17-metre yacht is the Ferretti 53, the result of the well-tested collaboration between Ferretti Engineering and Studio Zuccon International Project.

The bold line underlines its performance, while the flybridge, fully equipped for lunch, makes outdoor life comfortable and relaxing and confirms one of the most distinctive features of all Ferretti products: the extraordinary ability to maintain the elegance and practicality that have led the Ferretti 53 to become a true top of the range.

The interiors, as always, are cared for in detail and made with the best materials: the bright living room with double dinette and the well-equipped galley create a comfortable and welcoming atmosphere; the helm station connected to the lower deck, the owner's cabin and bow with the comfortable private bathroom and the other spacious cabins give the owner and his guests all the comfort and elegance typical of a Ferretti.

On a technical level, the deep-V hull and the two 660 hp Caterpillar engines guarantee a top speed of 31 knots and a cruising speed of 27 knots.

The slight difference between these two speeds is the result of the highly advanced research in the design of the hull designed by Ferretti Engineering and above all the collaboration with FZ which has led to a new design of the inverters with the great result of having high cruising speeds.

Ultimately, the exceptional performance, the design that maximizes space and
