Description

Dufour Yachts 37 3-cabin version, ready for delivery

The Dufour DNA has remained unchanged: enjoy the large outdoor living spaces.

On the Dufour 37, the important innovations that contributed to the success of the Dufour 470 have been introduced: the layout of the dolphin boat, the large windows on the deck and on the side, the distribution of the outdoor spaces that facilitate movement on the deck of the boat. The cockpit is also wider than other sailboats of this size.

On this new model, as has already been the case for the latest models in the range, priority has been given to outdoor life.

In terms of marine performance, this sailboat boasts a modern and stable hull similar to that of offshore racing boats, but with a slightly rounded lower part of the hull that favors the cracking of the waves and reduces noise inside the boat.

This new hull considerably improves the power-to-weight ratio of this 10.80-metre sailboat overall: stronger sensations at the helm that increase the helmsman's pleasure at any speed.

On this new model, and compared to the other models in this category, the mast is longer and allows you to increase the sail area to improve the performance of this sailboat.

The Dufour 37, like its predecessor, the Dufour 360, has a single-blade wheelhouse and two wheeled rudders. The single-blade increases responsiveness and liveliness at all speeds.
