Description

Ecoracer One Design 30 is the first monotype in the world built with recyclable materials and with rComposites technology, developed by Northern Light Composites.

Matteo Polli has designed a hull that can plan easily without precluding the simplicity of handling the boat, with an eye also to the ORC regulations.

The rComposite® construction technology, which guarantees recycling at the end of the boat's life, is this time in its version dedicated to performance: a thermoplastic matrix combined with the lightness of carbon fibers for the hull, while the cockpit was created using the fiber of linen.

One Sails sail set. Carbon mast. Aluminum boom. Dyform rigging. Anti-skid in cork cockpit. Mercury 6hp outboard engine.

Excellent condition, like new. Available from the end of the 2024 racing season.

Staging and technical:

Strand rigging (Dyform), 2 Winch.

Security equipment:

Safety equipment within 3 miles.

Sails accessories:

Gennaker equipment, Bowsprit (Bowsprit), Ball bearing slider mainsail, Backstay tensioner, Mainsheet traveller, Rod Kicker.
