Nella zona giorno le altezze sono sempre al di sopra della media e sfiorano i 2 metri. Più basse invece quelle in cabina che si fermano a 1,87 metri.

La scala per salire sul fly è posta intelligentemente su un lato per non ingombrare. I gradini risultano però un po' troppo ripidi.

Anche su un 50 piedi la moda va seguita: l'armatoriale è a centroscafo e sfrutta tutto il baglio massimo, mentre la cabina vip è posizionata a prua.

Due i motori montati per un totale di 1.150 cavalli. Qualche cavallo in più non guasterebbe per aumentare le prestazioni.
