bali 4.8

1 200 000 € + VAT

Description

The Bali 4.8 is designed and built to offer a very high level of cruising comfort, while maintaining many of the peculiarities, both in terms of construction and design, that distinguish the range. Box structure, which is connected with the solid infusion technique to the two hulls, give a particular rigidity to the Bali 4.8. Large and really well equipped flybridge. The dinette consists of a dining/relaxation area at the stern and a galley and chart area further forward, and is a single room without any bulkhead or dividing door. Access to the outside is guaranteed by a tailgate, in fact located in the aft part of the dinette structure, and its (electric) opening movement is like a shutter. The structural rigidity of this catamaran helps to make occupants feel calm and safe. The door that connects the dinette to the well-equipped forward cockpit is also open, the feeling is to sail practically outdoors (the ventilation is excellent), but still to be in a well-protected and sheltered environment. The splashes that arrive on board are minimal, the hulls of the Bali are equipped with a step that, positioned just above the water line, on the one hand "deflects" the spray outwards, and on the other increases the volumes of the interiors.

Navigation equipment:

Rudder angle indicator, Radar Antenna, Electronic engine control, Chain counter, Display, DSC vhf, Plotter with GPS antenna, Sonar, SSB.

Staging and technical:

Engine Alarm, Bilge Alarm, Spare shaft, Water pressure pump, Teak Side Decks, Deck Shower, Headlights fixed on the stem, Directional Spotliht, Crane, Courtesy
