

SALE NEW

nautor swan Swan 78

Description

All of Nautor's know-how and experience in racing and cruising yachts have been incorporated into this new blue-water Swan 78, a direct descendant of the original Swan 80 and 82 models of the past. Slightly shorter overall, but beamier and more powerful, the modern hull lines, including a wide stern above the waterline, twin rudders, and racing-oriented keel design, are a reflection of the rapid evolution of yacht design. The deck, with its modern design and straightforward solutions for sail handling and life at sea, presents a look of neatness and efficiency.
