greenline yachts 58 fly

1 551 500 € + VAT

Description

Greenline 58 Fly is characterized by a design with fluid lines and the presence of eleven solar panels that allow sustainable navigation, a trademark of Greenline Yachts.

At the stern there is an extended hydraulic platform that creates a beach lounge very close to the sea, two seats and a folding table that allows this area to be converted into a large relaxation area.

At the centre of the main deck is a spacious convivial area complete with a galley and a refined wooden table surrounded by comfortable sofas.

At the bow there is a large sundeck, which at the end turns into a seat that is added to the two sofas already present.

The flybridge, on the other hand, has a helm station, a dinette with a central table and bar area and a large area where you can put deck chairs.

Finally, below deck, the standard configuration includes up to three cabins with private bathrooms and walk-in closets for the owner and the VIP suite. The owner's cabin is located amidships, the VIP room is located forward, while the double room is on the starboard side and can be converted into a study.

Equipped with state-of-the-art systems and versatility, Greenline 58 Fly is an excellent condensation of power, sophistication and functionality.

OPTIONAL H-DRIVE with CUMMINS engines: 2 x 25 kW Electric motors (50kWh approx. Lithium polymer battery)
