Description

Next 330 LX (an acronym that identifies the "ultra-luxury" products in the range) is a sundeck with a more innovative concept, designed with more advanced processing techniques.

This model was built with the Fully – Developed Cockpit System technique, i.e. a monocoque construction system that has made it possible to maintain the maximum beam of the boat for about 2/3 of its maximum length, a solution that optimizes comfort.

The deck is generous in space: at the stern there is a large living area where it is possible to accommodate up to eight people thanks to the drop-down seats and the retractable electric table. The latter can easily be transformed into a large sundeck.

Sink and stove are placed in the stand-up while in the front there is a large icebox fridge, above there is a large seat with two bolster systems, which allow you to navigate standing or sitting.

The below deck has a generous cabin that accommodates up to four people in two separate rooms, in addition to the toilet.

The hull has been designed to enhance the boat's seaworthiness: in addition to the second-generation H.I.S. system with double redan, new geometries have been used for the glides, a solution that enhances its performance.

STANDARD EQUIPMENT:

2 Automatic bilge pumps with system – 8 Portholes – Luxury cabin equipment –
