greenline yachts 39

365 900 € + VAT

Description

The Greenline 39 is sophisticated in design, technology, production quality and for the environment.

The design of the Greenline 39 has been improved on every single point: from the single level of the deck with a low center of gravity to the hydrodynamics of the hull, which allows low fuel consumption seaworthiness and at the same time speed and stability.

Following the Greenline philosophy of sustainable navigation in full comfort, the new Greenline 39 respects the environment and offers the possibility of navigating even in protected areas thanks to the Hybrid or Full Electric engine.

With its convenient open space and easy access to the water, the new Greenline 39 is perfect for both day trips and longer cruises, without ever giving up the comfort of an apartment thanks to 220V electrical outlets and appliances that are always working, thanks to the 4 solar panels on the roof.

OPTIONAL H-DRIVE: 1 x yanmar 250hp + 1 Electric motor (11kWh Lithium polymer battery)

STANDARD EQUIPMENT:
