Description

INNOVATIVE AND ECO-FRIENDLY

Ready at the buoy FANTASTIC AND INNOVATIVE Franchini MIA 63-T

MIA is a boat full of emotion, capable of tying together that emotional thread that binds the past of the Franchini Shipyard to its future, in which emotions are always a common denominator.

The first, fundamental, innovation concerns the use of nanotechnologies in the formulation of resins through a patented process that allows highly improved results in the structure, which is stiffer and lighter, significantly reducing vibrations and sound propagation. The use of Volvo IPS engines streamlines performance and reduces fuel consumption, improving overall efficiency.

Mia 63 is the result of a vision, or rather an aspiration: to build an avant-garde boat with the highest respect for the environment with the use of innovative materials and sophisticated solutions.
