

sacs Strider 15

595 000 € All Tax Included

Corso Sempione 4 20154 Milano

Description

Beautiful SACS Strider 15 to see!!

The Strider 15 is at the top of the Individual Class range and despite its large size it retains the sporty spirit and practicality typical of inflatable boats.

Although it is a walkaround, below deck the height reaches two meters both in the entrance hallway and in the bathroom. The boat has two doubles, the first is located at the bow, while the second is at the stern, under the floor.

The size of the cockpit is surprising, furnished with sofas, armchairs and a galley cabinet. Even at the bow it was preferred to organize a living room with many sofas that offer, in any case, the possibility of lying in the sun.

The whole deck can be shaded. At the stern, a servo-assisted system allows the sun awning to be set up without any effort, while at the bow very light carbon supports are used to be inserted into special seats.

The aft sundeck and the swim dashboard are immensely large and their dimensions help to define the exclusivity of this product.

A very light T-top, made like the entire construction with vacuum resin infusion technology, protects the helm station, together with a large and high windshield.

To navigate safely and comfortably, four bucket-around, well-padded driver's seats have been designed.

The Strider 15 has been designed to cover long distances very quickly. The cruising speed is in fact 42 knots and the maximum speed reaches 48 knots with
