## Description

The BS 100 combines elegance, performance and flexibility, making it perfect for long rides and daily use.

With a high-tech and elegant design, it fits any mega yacht thanks to the customizations available. This inflatable boat offers reliability and safety even in rough sea conditions, ensuring unparalleled comfort. Equipped with two 260 hp Mercury Diesel sterndrives, its hull is tested to ensure optimal performance in every situation, transforming every boat into a unique and exciting experience.

Deck accessories designed make it comfortable and pleasant, ideal for both sailing and relaxing at anchor. At Novamarine, they know that true greatness is not measured in meters. The BS 100 embodies this philosophy: it is proof that compact dimensions can offer emotions and performance comparable to those of larger boats.

The hull was obtained with water lines capable of facing the sea formed in absolute safety and without ever giving passengers excessive sensations.

Among the fittings, another thing we appreciated is the toilet inside the deck structure that also houses the bridge, a small room that also offers a sink and the space to change and take a shower

The black livery goes very well with the teak of all walkable surfaces, also highlighting the excellent quality steels used both for the bollards and for the handrails

On this model, the windshield, thanks to the folding upper part, gives the driver
