

SALE NEW

lift foil Lift Foil 3 /4 E-Jet

Description

For sale at OrangeYachting The lift eFoil is an exciting and fun way to glide over the water like never before! Imagine cruising above the waves, feeling like you're flying—completely silent and smooth. This electric hydrofoil surfboard gives you the feeling of surfing, without needing any wind or waves. With just a little balance and a wireless hand controller, you can lift off and experience the thrill of riding over lakes, rivers, or ocean bays. The eFoil is powered by a rechargeable battery and a quiet electric motor attached to a sleek underwater wing. As you speed up, the board rises above the surface, reducing drag and making your ride feel almost magical. You can control your speed and enjoy the ride at your own pace, whether you're looking for a calm, leisurely cruise or an adrenaline-fueled adventure. The best part is, the lift eFoil is easy for beginners to learn, while also challenging and thrilling enough for experienced riders. Whether you're an adventure lover or just want to explore the water in a new and incredible way, the lift eFoil promises an unforgettable experience. With kind regards, Team Orange Yachting
