ice yachts Ice 60

1 300 000 € All Tax Included

Description

' ICE 60, developed directly by Umberto Felci's studio together with the shipyard's technical staff, is a true fast cruiser of the highest quality, making excellent use of space and with a beautiful line.

Derived from the powerful lines of the ICE 52 and 33, with a mix of contents taken from our 62 and 82 feet, it even manages to have an interior space 7% greater than our ICE 62 while maintaining all the characteristics of robustness, seaworthiness and performance that distinguish the shipyard and that have led it to success.

On the hydrodynamic level, the water lines and appendages, this time characterized by an unprecedented draught of 2.85 meters, are designed to achieve great performance, with impressive results that highlight the ICE 60's ability to go upwind at very tight angles and to glide very fast at downwind speeds..... and with a motor speed of 10 knots!!

To guarantee these performances, the high technologies used in the construction and the incredible quality of a craftsmanship of the highest quality, carried out by technicians who make use of the experience gained over many years of activity dedicated to the construction of boats that have written the history of sailing.

The shell and blanket are laminated in infusion from a female mold using hybrid fibers of glass and carbon; The carbon structures are laminated on site, also in infusion, becoming one with the hull and deck.
