

SALE PRE OWNED

alumarine shipyard 80

Description

Marlin del Rey is an 80-foot aluminum yacht, designed by Sylvestry Langevin and built by Alu Marine in 1989. Recently equipped with two new Yanmar engines (2024), it guarantees exceptional performance and reliability at sea.

Ready to sail with all its systems in perfect working order, Marlin del Rey also represents a rare opportunity for a refit project. Given the high prices of new yachts today, this boat offers a unique potential for a complete renovation thanks to its robust aluminum structure and timeless design. In addition, our partner Squalt Marine, in Tunisia and led by Claude Kermoad, who participated in the construction of this boat more than 30 years ago at Alu Marine, is ideally positioned to carry out this refurbishment at a competitive price.

Whether you are planning to transform Marlin del Rey into a luxury charter yacht or a family cruising sailboat, we have a complete yard monitoring file on a newly refurbished sister-ship. We would love to share this experience with the future owner.

Why choose Marlin del Rey for a refit?

Aluminum Construction: Perfect for a complete renovation.

Recently re-engined: Two new Yanmar engines for optimal performance.

Generous volumes: 5 cabins with en-suite bathrooms, separate crew quarters, large saloon and enclosed cockpit.

Wise investment: An attractive quality/price ratio compared to new yachts.
