Building / facilities description

The Dalu 47 is a cruising monohull designed by naval architects Joubert & Nivelt and built by Meta Yachts. Produced between 1980 and 1984, this 14.32-metre yacht is a robust and versatile all-round dinghy. Only 40 examples were produced, making this model a true sailing classic. Thanks to its integral centreboard, the Dalu 47 makes it possible to reach anchorages in shallow waters in complete safety. It has two comfortable cabins: a master cabin occupying the full width of the aft section of the boat and a guest cabin forward. The boat has a full bathroom with toilet, washbasin and separate shower, as well as a large, spacious saloon facing a full-length galley. Solidly built and designed for autonomy, this yacht has a large capacity for solar panels, providing a continuous supply of energy, even during extended sailing. After several transatlantic crossings, its captain has decided to drop anchor for good. This robust yacht, ready to take on new challenges, is just waiting to set off on new maritime adventures.
