Description

Passenger boat QUER Q40 from 2007, 36 passengers, under Spanish commercial flag, 2nd register.

The Quer 40 Seabus is the flagship model of the professional range, ideal for charter companies looking to diversify their offerings or establish themselves in the passenger transport sector. This versatile vessel enables fast excursions, whale-watching tours, coastal cruises, and Taxi Boat services, among others.

Designed to carry up to 36 passengers and two crew members, the Seabus maximizes every seat, providing fast, stable, and maneuverable navigation, especially during sharp turns at high speeds. Passengers enjoy a sense of complete safety while experiencing thrilling moments. With its helm positioned at the rear, the captain can constantly monitor passengers, significantly enhancing safety.

The Seabus features the exclusive QEFS bow technology, which atomizes water and reduces fuel consumption. This bow, combined with a transverse-stepped hull, ensures comfortable and dry navigation, even in rough seas, by reducing wave impacts and minimizing nausea effects through the elimination of frequent decelerations.
