Description

It is a cabin cruiser that measures seven meters and fifty in length, but inside it has been designed as a decidedly larger boat. In the cockpit we guaranteed a seat for everyone, with two comfortable upholstered sofas that form an "L" (one of which can be removable), a driver's seat that includes a seat for a passenger in the back and a table that can be assembled when needed to have lunch all together. The engine, sterndrive, is located in the engine room and therefore, in addition to being silent, does not detract from the livable space. Inside, in addition to the forward owner's bed, there is a second sleeping area with a queen-size bed, located right at the entrance to the cabin (under the helm station). You can invite a couple of friends or otherwise, guarantee your children a comfortable and independent stay on board. Then, in addition to the separate toilet room equipped with all the accessories, in which you can stand, we have also created a kitchenette near the cabin door. Finally, let's not forget that at the bow, on the deckhouse, protected by a generous steel handrail, you can lie down on a comfortable sundeck even while sailing. The latter is made soft even in difficult situations by a deep hull, typical of our boats, which will always guarantee you fun and safe crossings.
