Description

MAINTENANCE AND REFIT DATA

Every year work is carried out on the boat where necessary to maintain excellent standards, such as (replacement of upholstery or equipment, counterboring of teak etc.

The main REFIT was carried out in 2020, the year in which the trim of the fly bridge was substantially modified to bring it to its current configuration as a very large sundeck that can be transformed in part into a large board for 12 people. Two hatches have also been opened on the deck bulwarks for easier access on board in the event of a ship side by side with the quay.

MAINTENANCE

Since this is a class ship, all the required checks are carried out annually by RINA, which carries out a total overhaul every 5 years, including seals, axles and valves.

Always stored indoors during the 6 winter months, the criterion of constantly maintaining it at maximum technical efficiency and aesthetics has been scrupulously followed by the professional crew and the best technicians in the Olbia area.

During these periods, the main engines were serviced every year by the mechanics of MTU Olbia with replacement of all original parts when necessary, taking into account the MTU tables regarding years and hours of operation. The engines are also equipped with the most important parts for any emergency work.
