linssen Grand sturdy 450 ac variotop®

Description

Linssen Grand Sturdy 450 AC Variotop

The smallest Variotop® within the Linssen Grand Sturdy Variotop® series. The 450 Variotop® is the result of an extremely complete and clever motor yacht, and with its Variotop® system it offers a delightful lockable space on the aft deck.

On the aft deck is the steering position with a spacious seating area, which provides access to the spacious cabin. The aft deck is closed with a double sliding door to the spacious aft deck, where two additional seating areas can be found. The 450 Variotop® can be quickly converted to a closed steering area, or to partially or fully fold it down, minimizing the cruising height.

With its large and lockable steering area, the Grand Sturdy 450 Variotop® allows you to enjoy every cruise both inside and outside. Every space inside and outside the 450 Variotop® is designed for optimal enjoyment in luxury and comfort.

Cruising towards the Mediterranean

Many water sports enthusiasts and yacht owners have it high on their bucket list: sailing 'inside' from the Netherlands to the Mediterranean. And rightly so. From north to south, especially with a Linssen, is a fantastic experience through a magnificent canal system and over 225 locks. From the Meuse to the Canal de l'Est (Branche Nord), Canal de l'Est (Branche Sud), Petite Saône, Saône and Rhône. Its ideal dimensions allow you to make this trip with the new 450 Variotop® comfortably and completely stress-free. That is the great advantage of a size smaller: your cruising area becomes even larger. With the 450 Variotop®

to the south, it is possible to reach the Mediterranean coast in a matter of days.
