

SALE NEW

wally Wallypower 50

Description

WallyPower50 Project, seamless flexibility The WallyPower50 is Wally's new 2024 project, developed following the success of its predecessor: the WallyPower58. It has the same clean lines as the latter, while combining the exceptional performance, perfect handling and aesthetic purity of the boats from this iconic brand. Added to this are new features, specially developed to ensure that the on-board experience remains as stimulating as possible. This new model combines the best of the WallyPower range with the iconic WallyTender. Find a flat surface, a flush bridge, as well as a glass and carbon dome, signature features of Wally. At the aft end of the deck, fold-down bulwarks on each side add 6 m² of additional space to the aft platform, providing further direct access to the water for your enjoyment. The interiors of the WallyPower50 are elegant and comfortable, with the centerpiece being the comfortable double cabin on the lower level, with bathroom. This benefits from Wally's famous innovative "magic porthole" technology: two flat screens, placed on each side of the boat, are connected to two 4K outdoor cameras arranged in the same way, which thus makes it possible to create a wide view to the outside, despite the absence of portholes.
