Description

The Pershing 5X is the perfect choice for those seeking a luxury sailing experience, combining speed, comfort and technology in an exceptional design. Whether sailing with family and friends or for professional use such as charter, this yacht offers outstanding performance and inimitable style. It's a safe and prestigious investment for any yachting enthusiast.

Exceptional design

The Pershing 5X was designed by the famous Italian designer Filippo Salvetti. It combines the sporty, aggressive and elegant lines that characterise the Pershing brand.

The X-Generation fibreglass hull gives it a futuristic look, while at the same time being functional, with high energy efficiency and reduced water resistance.

The open, flowing design promotes a unique onboard living experience, while maximising exterior space.

Unrivalled performance

The Pershing 5X is powered by VOLVO IPS 950 1450hp engines, giving a cruising speed of around 35 knots and a top speed of around 40 knots.

This exceptional power, combined with the design of the hull, means she can sail with perfect stability, even in difficult sea conditions.

The IPS (Inboard Performance System) propulsion system offers optimum manoeuvrability, with rapid response at the helm.
