ferretti yachts Ferretti 881 rph

2 500 000 € All Tax Included

Description

Every year work is carried out on the boat where necessary to maintain excellent standards, such as (replacement of upholstery or equipment, teak counterboring, etc.). The main REFIT was carried out in 2020, the year in which the set-up of the fly bridge was substantially modified to bring it to its current configuration as a very large sundeck that can be partly transformed into a large board for 12 people. Two hatches have also been opened on the deck bulwarks for easier access on board in the event of a ship alongside the quay.

Since this is a class ship, all the required checks are carried out annually by RINA, which carries out a total overhaul every 5 years, including seals, axles and valves. Always sheltered in the 6 winter months, the criterion of keeping it constantly at the maximum of technical efficiency and aesthetics has been scrupulously followed by the professional crew and the best technicians in the Olbia area.

During these periods, the main engines were serviced every year by the mechanics of MTU Olbia with the replacement of all original parts when necessary, taking into account the MTU tables regarding years and hours of motion. The engines are also equipped with the most important spare parts for any emergency work. The same goes for ONAN generators by Onan technicians and all the other equipment of the various systems on board from electrical and electronic ones, to air conditioning, to toilets, to valves. etc. The work carried out can be verified by examining the relevant invoices.
