isa yachts Extra 93

9 500 000 € ALL TAX INCLUDED

Description

The ISA Extra X93 is the emblem of the evolution of the concept of modern yachting. This 28.5-meter yacht represents the encounter between Italian construction tradition and cutting-edge technology, with a style that stands out for its elegance, robustness and efficiency. Designed to meet the needs of sophisticated and demanding owners, the yacht is proposed as a platform of excellence to experience the sea with a new approach: more sustainable, more dynamic, more personal. Born from the collaboration between ISA Yachts and the Francesco Guida design studio for exterior design, with interiors signed by the Hot Lab studio, the Extra X93 immediately stands out for its taut and decisive lines, for the imposing vertical windows and for the skilful use of technical materials and fine finishes. The yacht immediately conveys a sense of quiet power, modernity and openness to the outside.

A New Philosophy of Navigation

The Extra X93 project revolves around the concept of "experiencing the sea" in a continuous, natural and fluid way. The boundaries between inside and outside dissolve, thanks to sliding doors, panoramic windows and lounge spaces that directly overlook the water. The innovative layout promotes relaxed sociability and authentic navigation, without sacrificing maximum comfort.

The Extra X93 is not only powerful, but also designed to be environmentally friendly. The combination of composite materials, advanced home automation systems and an efficient engine reduces emissions and fuel consumption.
