## Description

---

The Sansita 70 FLY is a flybridge yacht under construction designed to offer an absolute luxury sailing experience, combining Italian elegance, advanced technology and great attention to detail. With an overall length of 21.30 meters and a width of 5.50 meters, this model represents a perfect balance between sportiness, comfort and design. The modern and sleek lines give a decisive but refined look, while the optimized hull ensures stability, fuel efficiency and smooth navigation even in demanding marine conditions.

The engine is entrusted to two 1200 HP MAN V8s, supported by a 17.5 kW generator, guaranteeing power and autonomy for long cruises in total serenity. The boat is certified in CE category A, therefore suitable for offshore navigation. The technical equipment is of a high level: 60,000 BTU air conditioning, electric bow thruster, hydraulic gangway and swim ladder, cockpit winch and latest generation Raymarine navigation systems, including radar and autopilot on the bridge and flybridge.

The flybridge is one of the yacht's most iconic spaces: it includes a sundeck, barbecue, refrigerator and secondary helm station, providing an ideal environment for outdoor socializing. In the bow, a lounge area with integrated cushions invites you to relax. The elegant and functional aft cockpit is completed by a polished teak dining area equipped for maximum comfort. The quality of the materials, the high possibility of customization and the craftsmanship make the 70 FLY a yacht designed to stand out.
