Description

Solemar SE42 Outback: Power, Comfort and Design in a Hybrid Inflatable Boat of Excellence

The SE42 Outback is a boat that combines the qualities of an inflatable boat with the comfort of a yacht. Powered by two 600 hp Mercury Verado V12s, it offers high performance (over 40 knots), optimized fuel consumption and maximum maneuverability thanks to the JPO system. Every detail is taken care of with craftsmanship: the systems are followed in all stages of production and certified with a personalized plate. The layout includes a large fiberglass hard top, cockpit area with driver's sofa, chaise longue, wetbar and convertible dining area, and a rear platform with integrated gangway.

At the bow there is a large sundeck with stainless steel handrails and safe passages thanks to the handrails. The panoramic windows illuminate the interiors, while the hull and the oversized tubulars guarantee stability, autonomy and safety in all conditions.

The photos are demonstrative and have no contractual value. For a personalized quote, we invite you to our headquarters in Fonteblanda GR.
