

SALE NEW

pardo yachts Endurance 72 - new

Description

The new Pardo Endurance 72 offering you design, style and livability. The Pardo family feeling is evident in the distinctive bow lines as well as in the walkaround deck and aft area. The cockpit area, equipped with two fold-down side terraces to create a huge chill-out zone overlooking the water, offers over 40 sqm of living space with a submersible swim platform. A manual or automated haulage system for tender operations allows to store a tender of up to 4m in the aft garage.

The flybridge, with 27sqm of exterior space, is protected and shaded by a louvered T-top, another exclusive feature of the Endurance range introduced with the new Endurance 72. The low-profile, extremely lightweight superstructure does not affect hull stability, trim and overall aesthetics. Moreover, owners can choose how to arrange the flybridge in terms of materials, fabrics and colors with furniture made in-house by Pardo's carpentry department.

Endurance 72 introduces a new parameter: the eco-speed; defined as the speed at which lower consumption is achieved as well as optimal setup for improved comfort on board. This displacement trim allows better fuel efficiency.

For the interior design of Endurance 72, Pardo Yachts has relied on the extensive knowledge and skills of Burdisso&Capponi Yachts&Design, hence sealing a new collaboration. Elegant gray walnut veneers with a matt finish, wallpapered bulkheads on the lower deck, technical fabrics for the ceilings, white Corian for the galley worktops and sand-colored resin in the bathrooms are some of the stylistic choices of the new designers.
