Description

ICE 23.95 is a modern and robust explorer yacht built in 2024 by the renowned Turkish shipyard Soyaslan Marine, which specializes in steel hulls for long sailings and demanding conditions. With a length of 23.95 meters and a width of 6.5 meters, ICE is a CE A category boat, designed to offer great autonomy, safety and comfort during long crossings. The hull is made of 8 mm steel, reinforced with an "ice belt" to cope with even cold waters and extreme conditions, while the superstructure is made of composite to reduce weight and optimize consumption. Powered by two 410 hp Cummins QSL9 engines, ICE reaches a top speed of around 12 knots, with an efficient cruising speed of around 10 knots and an impressive range of over 4,000 nautical miles. The boat has a gross tonnage of 165 GT and a capacity that allows ocean crossings in total independence. Designed for exploration, ICE features a tri-deck layout with numerous relaxation areas, a large flybridge, outdoor dining area and hydraulic platform.

ICE 23.95 is ideal for experienced owners looking for a yacht with an adventurous spirit, as solid as a small explorer, but elegant and livable as a superyacht. The boat is practically new, ready for delivery, and represents a rare opportunity in the panorama of high-level compact explorers.

Interior description

The interiors of the ICE 23.95 yacht are a perfect balance between functionality and contemporary design, designed to offer maximum comfort in all sailing conditions. The project favors natural light, with large panoramic windows that visually connect the interiors with the
