Description

A MASTERFUL BLEND OF DESIGN, TECHNOLOGY AND PERFORMANCE

The PJ63 is the result of Palmer Johnson's new focus on hull technology and lightweight construction. A yacht with reduced fuel consumption and carbon emissions of 33-50% across the speed range.

The hull is an improvement on the tri-hull PJ previously used on the highly regarded PJ48m Khalila, Palmer Johnson's groundbreaking and fuel-efficient superyacht.

This advanced hull is also designed for comfort. Its very fine bow and curved sections aft provide a smooth and enjoyable ride up to a top speed of 33 knots.

The displacement characteristics include a low banking angle in high-speed turns, no slamming, and consistent stability.

Another key feature of this latest Palmer Johnson model is that the top speed can be comfortably maintained in rough seas, whereas typical planing yachts would have to slow down.

With its generous beam of 6.3 meters, the PJ63 has the largest open deck lounge in its 60-80 feet class. The lower space includes a spacious full-beam master cabin, a salon/galley, and a forward guest cabin.

The distinctive unibody design, with blended and sculpted surfaces intersecting sharp and precise lines, ensures immediate recognition as a Palmer Johnson sport yacht.
