Description

Pardo 75 (T-Top version): the villa on the sea

After the presentation of the Pardo GT75 at the Cannes Yachting Festival 2022, the new Pardo 75 (T-Top version) has now joined the Walkaround range, with Cantiere del Pardo concept, naval architecture by Zuccheri Yacht Design and exterior/interior design by Nauta Design.

The Pardo Yachts Walkaround range welcomes its new flagship, the Pardo 75 T-Top, designed for owners who want to expand after appreciating the Pardo 50 and who want more space in the sleeping area and outdoors, while maintaining the specific characteristics of the Walkaround range. This line is well-known for its performance and its practical and comfortable layout; it includes yachts that are easily manoeuvrable and designed to navigate in total safety thanks to their configuration. Having all of the above does not mean cutting back on functionality and great attention to design.

The characterising feature of the Pardo 75 profile is its uniquely styled T-top, made of carbon fibre, which protects the central lounge area. In the standard "galley up" version, it is equipped with an external kitchen on the right side and a dry bar aft of the wheelhouse.

On deck there are also two other lounge/solarium areas, one at the bow and another at the stern; the latter (positioned above the garage that can store a 2.80 meters tender and toys) has fold-down terraces along the side, which add 5 square meters to the available space. This is a significant improvement in the quality of life on board, always in close contact with the sea.
