riva 50 hp superamerica

220 000 € ALL TAX INCLUDED

Description

Riva 50 HP Superamerica maniacally overhauled in 2016, further improvements carried out in 2020.

The Riva Superamerica has been the flagship of the fiberglass production of the Riva Shipyards for about 20 years, known and admired all over the world, it was built in 251 units from 1972 to 1992; it was the first flying bridge to be totally designed in the shipyard to a design by Arch. Giorgio Barilani, who designed the futuristic and bright cylindrical atrium, positioned under the windshield and leading from the dinette to the two cabins; a project that recalls Giotto's artistic perfection. The 50 HP is the latest series of this inimitable fly model, the quintessential Riva concept and design applied to this magnificent model. This Super America is like a capsule that allows a journey through time in the historic Riva Shipyards, maniacally overhauled in 2016, further improvements carried out in 2020, extremely cared for respecting the originality of each of its parts. Further information on request.

Deck: Teak cockpit. Large bow sundeck. Flybridge with helm station and central seats typical of Riva, sundeck.

Below deck: Dinette with central helm station, chart area, dining table, sofa that can be converted into a bed. Fully equipped kitchen.
