

SALE NEW

iron 647

52 200 € All Tax Included

Description

Bareboat price without option.

Boat in the catalog (not in stock), configuration possible on order.

With its unique side fenders integrated into the hull (IRON FENDER), inspired by modern ships and aircraft, IRON boats have a character of their own. Even at dock, IRON boats do not go unnoticed. The design of the side fenders with air channels dampens movement, resonance noise and lowers the center of gravity.

The IRON 647 is the smallest unit in the range with its 6.52m long hull and possible engines from 115 to 200HP.

The speeds recorded range from 35 to 48 knots depending on the engine installed, enough to ensure sporty navigation!
