Description

NEEL 47 – Exceptional trimaran combining performance, safety and comfort

The NEEL 47 represents a new generation of cruising trimarans, designed to offer an uncompromising maritime experience. Designed by the Marc Lombard Design Group, this multihull stands out for its perfect combination of safety, comfort, performance and modernity, making it an ideal choice for demanding sailors looking for freedom and speed.

Safety & Stability at Sea: A Major Asset

One of the most convincing arguments of the NEEL 47 is its remarkable stability. Thanks to an optimised beam and the centering of the weights on the central hull, it offers much safer seamanship than a catamaran, especially in rough seas. On a NEEL trimaran, the critical angle of heel is only reached at around 27°, whereas a catamaran reaches its limit from 12°, making sailing more reassuring and controlled even in difficult conditions.

Its handling is also smoother: rolling movements are limited, guaranteeing optimal comfort, even on long journeys on the high seas.

Performance: a multihull built for speed

NEEL trimarans dominate the competition when it comes to real cruising performance. The NEEL 47 regularly sails at around 10 knots, covering more than 200 miles in 24 hours – with peaks of 15–18 knots when the wind picks up.

Its rigging structure inspired by ocean racing allows for exceptional upwind performance thanks to the excellent rigidity of the forestay. The
