Description

The Raffaelli Maestrone 52 is one of the most popular Italian flybridges in terms of volumes, navigation and construction solidity.

This unit clearly stands out on the market because the current owner has carried out a very important technical and functional refit over the years, making it today a ready-to-use, reliable and up-to-date boat where it is really needed.

Engines completely landed and overhauled, new diesel tanks, new electronic throttles, renewed upholstery, teak in excellent condition: interventions that eliminate the typical criticalities of boats of this age group at the root.

The boat is in excellent general condition, with well-preserved interiors, extremely rational layout and spaces that are still superior to many modern boats in the same category.
