Description

Beneteau Antares 8.60 – 1984 – Volvo Penta 235 HP

This Antares 8.60 belongs to a true boating enthusiast who has personally taken great care of the boat over the years. She is presented in remarkably clean and well-maintained condition for her age.

She is powered by the well-known Volvo Penta TAMD 60 developing 235 HP, widely recognized as one of the most reliable marine diesel engines of its generation. Robust, mechanically simple and built to last, this engine is known to regularly exceed 4,000 to 6,000 hours when properly maintained. With only 2,000 hours, she still offers significant cruising potential.

The large aft cockpit is a major asset: spacious, open and highly practical, it is perfect for family outings, relaxing at anchor or fishing trips. Its layout provides easy circulation and makes full use of the outdoor space.

On board, you will find a comfortable cabin, an electric toilet, a cooker, a depth sounder, a bow thruster for easy maneuvering, and an electric windlass.

A solid, reliable and ready-to-go boat, ideal for coastal cruising and enjoyable days at sea.
