Description

Discover this 2008 Meridian 341 Flybridge, powered by twin Cummins QSB 5.9 engines delivering 380 horsepower, mounted on shaft drives for reliable and efficient propulsion.

Designed to American standards, this flybridge yacht stands out with an impressive level of finish, typically found on larger vessels. Its upscale positioning aligns it with prestigious brands such as Pearl, Sunseeker, and Princess, both in terms of comfort and elegance.

The helm station is equipped with a full suite of electronics, along with a joystick control that greatly simplifies docking maneuvers. The boat is also fitted with bow and stern thrusters, ensuring perfect handling in all conditions.

Its powerful engines allow for a comfortable cruising speed at 2,300 rpm, without putting unnecessary strain on the mechanics—guaranteeing smooth and confident navigation even in rougher seas. Thanks to its shallow draft for a shaft-drive boat, approaching coastal anchorages is easy and reassuring.

The current owner is exceptionally meticulous, maintaining the vessel with great care—mechanically, electronically, and aesthetically. The result is outstanding: the boat is presented in remarkable overall condition.

The engine batteries were replaced in June 2022, and the four service batteries were renewed in September 2022.

The boat is sold with all original documentation, along with its complete history—from the original purchase invoice to the most recent maintenance records.
