Description

Chiu chiu is a timeless boat, with almost new engines. In 1958, American engineer Dick Fisher set up his own shipyard in Massachusetts. He named his hulls Boston Whaler, where Whaler means "sailboat" and Boston is the capital of this American state. Fisher based his concept on the qualities of the newly invented polyurethane foam, which he injected between the two hull skins. Thanks to this revolutionary process, Dick Fisher ensured his hulls unparalleled solidity and unsinkability. The stability of gullwing hulls is also a very popular feature among Boston Whaler users. The counterpart to this design is a fairly wet boat, slamming into chop with its head held high. This will not stop the Boston Whaler from being acclaimed by fishermen and marine professionals. Benefiting from a very lively boating market, Boston's boats sell well and are exported all over the world. The model for sale was designed primarily for family use, the range is distinguished by the Central Console deck layout. This arrangement creates a central passage that facilitates movement on board and maneuvers in port
