PRICE UPON REQUEST

Description

REFITTED THE BOAT IN 2016

Classic lines, large volumes and great livability on board, it is an m/y flybridge built by the renowned Italian shipyard Permare, the AMER 86 model stands out for its hull and excellent use of space, both interior and exterior.

The configuration includes 4 cabins: a full beam owner's suite aft, a VIP suite forward with a queen-size bed and two double side guest cabins, all equipped with private bathrooms. At the stern there is a crew cabin with three berths and independent access, guaranteeing privacy for the owner and guests.

The interior is finished with light woods and quality materials; The living room is bright thanks to the large windows, with a relaxation area, a dedicated dining area and a fully equipped kitchen in a separate room. An external layout designed by Profilo Design and the interiors designed by the shipyard, Andrea Bagicalupo has created an absolutely new mould in every element, from the hull to the deck, up to the superstructures, using vinylester resins subjected to a special anti-osmosis treatment, capable of guaranteeing a finished product of the highest quality and theoretically unlimited durability over time.

All on a soft, stable and safe hull at all speeds and in all weather and sea conditions. The studies of the Amer 86's hull have not been directed towards the search for exasperated performance, so much so that the hull design is designed to reach maximum speeds of around 30 knots, but to ensure maximum safety, comfort and elegance, without forgetting the privacy that is essential to ensure high-level cruising.
