

SALE PRE OWNED

solaris 64 rs

Description

The Solaris 64RS is the result of the work of Javier Soto Acebal. It is an extremely innovative yacht in the world of fast cruising boats, characterized by a raised saloon and a 360° view that allows the engine room and engine to be in the middle of the boat. The sound comfort of the aft cabins is thus greatly improved.

The innovation begins in the interior layout, which includes a sail locker at the front that can be used as a crew cabin with a separate bathroom. The forward cabin, very large and with plenty of storage space, can accommodate a central or side bed. The kitchen is near the mast. The large saloon is characterized by the starboard descent, which means there is only one corridor for the two aft cabins. Each cabin has its own bathroom with shower. The 3-meter tender garage has longitudinal access, not affecting the volume of the aft cabins. The offset starboard descent also allows for a very large cockpit with a large table convertible into a sunbathing area to port and a passage to starboard, before the cockpit benches. At the rear of the cockpit is the work area with a central winch for the mainsail sheet and two others on the side.

The hull design is very modern: a wide stern housing the two steering wheels and a slightly raised bow. The keel is T-shaped with two drafts, a retractable keel that does not impose any clutter in the saloon is possible as an option.

Like all Solaris, the construction of the 64 RS is impeccable: composite bulkheads laminated to the hull and deck to create a monobloc effect, great mastery of infused composite.
