Description

The LAGOON 51 is a completely innovative and eco-friendly catamaran!

OPTIMIZED EXTERIOR AND INNOVATIVE FLYBRIDGE

The first novelty of all are the optimised outdoor spaces: the flybridge of the Lagoon 51 is innovative for the modularity of its spaces, the ingenious ergonomics and the comfort of this large convivial space. The flybridge has been reformulated to occupy 80% of the deckhouse with 2 beautiful sundecks forward of the wheelhouse and a large area with C-shaped seating, in which the central table can be lowered to create an XL sundeck.

LAGOON 51: AN INNOVATIVE AND ECOLOGICAL SAILING CATAMARAN

For the Lagoon 51, already equipped with walkable solar panels even in the standard version, it allows a further addition of XXL solar panels on the deckhouse. This technology provides over 3400 watts of power to run all onboard services. The new Lagoon 51 is therefore completely autonomous (except for air conditioning). The solar panels integrate perfectly into the lines of the catamaran and do not disturb life on board. The flybridge and sundecks on the deckhouse are accessible and usable both in the presence and absence of solar panels.

SEANAPPS TECHNOLOGY ON BOARD

Lagoon 51 is equipped with the innovative SEANAPPS technology to always guarantee navigation safety and information management even remotely. When you're not on the boat, always monitor the status of your batteries, or the geolocation of your boat via a convenient mobile app.
