solaris 40 st

Description

A step towards the future.

The sail plan has always determined the behavior of the boat at sea; it is the result of research and evolution to improve performance and ease of handling. Thus, the shape of the mainsail has become more square at the top with a vertical drop to provide more power and balance to the boat. From this observation was born the 40 - ST Square Top, which offers the following advantages:

- Gaff mainsail, more efficiency with more power at the top of the sail
- The mainsail is more manageable with a shorter boom and a foot length equivalent to that of the jib.
- Aerodynamic performance is better with less drag and better overall balance of the boat
- Better optimization of space in the cockpit, more conducive to the installation of a bimini.

The rigging of the Solaris 40 - ST is an option for the Solaris 40 and represents a step towards the future for this type of high-performance and comfortable sailboat.

The Solaris 40 has all the innovations that characterize the larger models in the range.

A concentrate of elegance and performance!
