2022 Hull polishing – replacement of right stern drive – new engine control unit

2021 Total Cockpit Closure

EXCHANGE WITH DINGHY 10m EVALUATED

It is the smaller of the two Flyer GT models offered by Bénéteau for leisure time. A sporty and fast boat, with a bright interior

The hull adopts Bénéteau's Air Step patent, which provides for two air intakes three-quarters of the bow, in which the air coming from outside is forcibly conveyed into a redan with the V facing the bow. From here the air is discharged through external skids. This technology amplifies the performance and stability of the boat and helps to reduce fuel consumption, achieve faster acceleration, benefit from greater safety in all conditions and ensure a "cushion" effect in the aft center part of the hull.

Navigation equipment:

Radar Antenna, Electronic engine control, Display, GPS (Simrad), VHF
