Description

BRAVA I-10300 Project

Pasquale Landolfi is one of the most competitive racers in Italy and boasts a long curriculum of regattas at the Admiral's Cup. His previous Brava, another Vallicelli project, garnered one of the highest scores in the 1983 Admiral's regattas. If Italy had lined up a team with a third boat of the caliber of Brava and Almagores, the Cup would perhaps have taken another path. In what was practically a triumph for boats with the lowest rating, Brava, with a rating of 32.2 feet, ranked at the third place tied with Pinta behind Almagores and Sabina, each of whom had a three-point advantage. Landolfi has it took three years to bring Brava to the top of his performance. He turned again to Andrea Vallicelli for his boat that he was supposed to be a One-Tonner since he wanted to participate in the Admiral's Cup. Fast One-Tonners feature fractional equipment, which meant a completely different way of approaching racing for Landolfi and the its crew always highly competitive. For the new Brava, he turned to the Morri and Para shipyard in Rimini, which built a wooden hull with a deck of material composite. It was launched at the beginning of 1984 and was part of the Italian team for the Sardinia Cup, finishing third absolute place. The following year she was well on point for the Admiral's Cup and easily proved to be the best of the team that year was rather weak.
