

SALE NEW

tecnomar Lamborghini 101

Description

Born of the continuing partnership between Automobili Lamborghini and The Italian Sea Group, the Tecnomar for ****Lamborghini 101FT**** makes her world debut at the Monaco Yacht Show 2025. She conveys Lamborghini's legendary forms onto the sea, where visionary geometries and pure adrenaline are distilled into a new icon of motion. At the core of the Tecnomar for Lamborghini 101FT lies a concentration of cutting-edge marine engineering. Her aluminium hull is paired with triple MTU 16V 2000 M96L engines, delivering a total of 7,600 horsepower. Combined with steerable Top System surface drives and Rolla propellers, this configuration ensures both exhilarating performance and surgical precision at sea. With a maximum speed of 45 knots and a cruising speed of 35, she redefines the limits of control and velocity in her class.

Beyond power, technology is expressed through balance: advanced spray rails, a shallow draft and hard-chine hull geometry ensure agility, stability and efficiency. Every system, from the dual 35 kW generators to integrated steering and trim control, has been engineered to match Lamborghini's philosophy of precision and responsiveness.
